-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 103

Claims 1-4,6-21,23-56 and 76 are rejected under 35 U.S.C. 103(a) as being unpatentable over O'Brien in view of Shukat et al.

O'Brien discloses a panel that has rings, sleeves or tabs, all of which are readable on element 20 which is sewn at 64 onto the curtain and hence "non-releasable". The rod has not been positively recited and the sleeves/rings 20 are capable of being mounted on a rod. Also provided are spaced guide elements 26 which guide pull cords 60 or 88. The panel is made of cotton fabric, column 3, line 58. The synthetic fabric of claim 7 is not chosen, thereby obviating the limitation of claim 9, etc. The use of the panel, i.e. room divider, wall hanging, etc., is a functional recitation that does not limit the structure of the device. The size of the panel is obvious depending on the size of the opening it is intended to cover. Referring to Figs. 13 and 14, O'Brien says that each cord 88 extends upwardly through the rings 26 and then extend to a "common lateral edge". This clearly indicates that the cords extend "across at least a portion of the panel at or near a top of the panel". What is not shown by O'Brien are the slats, or the equivalent thereto, dowels. However, such are well known in the art, as illustrated by Shukat at 52. It would have been obvious to modify O'Brien to have such slats so as to provide defined pleats. See Fig. 5 in Shukat et al which illustrates the accumulated configuration of the panel.

Claims 57-60,62-75 and 77-80 are rejected under 35 U.S.C. 103(a) as being unpatentable over O'Brien in view of Shukat et al, as applied above, and further in view of Hwang.

Providing pulleys and a cord lock to provide smooth, low friction guiding of the cords of O'Brien and easy, convenient locking thereof is well known the Roman shade art, as illustrated by Hwang. In view of this teaching, it would have been obvious to modify O'Brien whereby he provides such pulleys and cord locks.

Response to Arguments

Applicant's arguments have been fully considered but they are not persuasive. As discussed in the rejection above, the cords clearly are directed laterally near the top of the shade. Further, the new recitations regarding the pulleys and cord lock are taught by Hwang.
